Faveo - Python Developer

About the job
About The Role

We are looking for a motivated Junior Full-Stack Developer with strong foundational skills in Python and a passion for building scalable, high-quality applications. You will work with senior engineers to develop both front-end and back-end features, integrate APIs, and contribute to overall system architecture.

Location : Chennai

Qualification and work experience: B.E/B.Tech (any branch) / 2-3 yrs Python experience

Key Responsibilities

- Develop, test, and maintain Python-based backend services and APIs.
- Work on front-end features using HTML, CSS, JavaScript, and modern frameworks.
- Collaborate with senior developers to design and implement scalable technical solutions.
- Integrate REST APIs and ensure smooth communication between front-end and back-end systems.
- Debug, troubleshoot, and resolve application issues.
- Participate in code reviews and follow best practices.
- Work with SQL/NoSQL databases.
- Contribute to documentation and technical specifications.

Required Skills & Qualifications

- Strong foundation in Python programming.
- Understanding of Python frameworks (Django/Flask/FastAPI).
- Basic experience in HTML, CSS, JavaScript.
- Familiarity with modern front-end frameworks.
- Knowledge of SQL/NoSQL databases.
- Understanding of Git version control.
- Problem-solving mindset and eagerness to learn.

Nice-to-Have Skills

- Exposure to cloud platforms (AWS, GCP, Azure).
- Experience with Docker or CI/CD pipelines.
- Knowledge of API authentication (JWT, OAuth).
- Basic understanding of Agile methodologies.
